Profile: Detail-oriented Software Quality Assurance Engineer with hands-on experience in **manual testing, API testing, regression testing, and test automation using Playwright**. Skilled in designing and executing test plans, validating REST APIs, documenting defects, and ensuring software quality throughout the SDLC using Agile methodologies.

Skills

QA Practices	Test Planning, Test Case Design, Test Scenario Writing, RTM, Test Documentation, Risk Matrix, Test Data Design, Bug Reporting, Defect Lifecycle, STLC
QA Tools	Postman, Playwright, Jira,Trello, Git.
Technical	REST API Testing, SQL, MySQ, Firebase, Browser DevTools, HTML, CSS, Python, Java, C, C++, Basic Security Testing (Authentication, Authorization, Input Validation), Basic Performance & Load Testing (Lighthouse).
Process	Agile Scrum, Sprint Planning, Daily Standups, SDLC, Root Cause Analysis, Requirement Analysis
Soft Skills	Analytical Thinking, Attention to Detail, Technical Documentation, Team Collaboration, Multilingual Communication –

Experience

QA Engineer **May 2026 — September 2026**
Samurai Geeks

- Designed, maintained, and executed 110+ test scenarios and test cases for a Shopify-based loyalty and reward management application, covering functional workflows, business rules, and edge cases.
- Performed functional, exploratory, integration, regression, API, and database testing across reward earning, redemption, refunds, cancellations, VIP tiers, customer synchronization, and storefront functionality.
- Validated reward calculations, discount eligibility, configuration rules, and cross-module data consistency between the application and Shopify.
- Identified, documented, and tracked defects in Jira with reproduction steps, screenshots, evidence, severity, priority, and business impact; participated in project meetings and QA discussions.
- Conducted an independent QA and security assessment review of a website security audit report, evaluating technical accuracy, evidence, severity classification, false positives, and remediation recommendations.
- Authored QA-related technical blog content for Learnium, a sister EdTech concern, to communicate software testing concepts and quality assurance practices.
- Developed and maintained beginner-level Playwright scripts for regression testing of selected critical application workflows.

Projects

QA Engineer | LearnLink LMS **2024**

- Designed and executed several manual test cases covering authentication, course management, enrollment, dashboard, REST API, and database workflows
- Performed REST API testing using Postman, validated SQL database records, and identified defects through structured bug reporting and regression testing
- Collaborated with developers on root cause analysis, defect verification, and release validation to improve application stability and software quality

Backend & QA | Hospital Management System **2023**

- Designed and executed functional and regression test cases for patient, appointment, record management, CRUD operations, and backend business logic
- Validated input handling, data integrity, SQL-based database consistency, and workflow accuracy; reported defects related to validation and system logic

Mobile App Tester | Root Android **2023**

- Conducted manual, usability, and regression testing for mobile e-commerce workflows including product browsing, cart, checkout, and payment interactions
- Identified UI, functional, and usability issues and validated fixes to improve application stability and user experience

QA Validation | Local Business Directory **2024**

- Conducted functional testing and database validation for listing, search, filtering, and backend consistency across multiple user scenarios
- Prepared structured test scenarios and defect reports to support product improvement and reliable feature behavior

Research

- **Design & Implementation of Intelligent Solar Panel System** — Abstract published at IEEE CS BDC Summer Symposium 2025
- Developed a smart energy optimization system with real-time monitoring, protection, and automated control; performed system testing, data validation, sensor accuracy verification, and performance analysis

Education

B.Sc. in Computer Science and Engineering, Ahsanullah University of Science and Technology **2021 — 2025**
CGPA: 2.814 / 4.00

HSC, Birshreshtha Munshi Abdur Rouf Public College **2020**
GPA: 5.00 / 5.00

SSC, Birshreshtha Munshi Abdur Rouf Public College **2018**
GPA: 5.00 / 5.00

Extra-Curricular & Co-Curricular Activities

- Executive Member — AUST Robotics Club: Coordinated technical activities, robotics projects, and collaborative system development
- Executive Member — AUST Programming & Information Club: Participated in problem-solving, development sessions, and student tech engagement
- Campus Ambassador — ICT Olympiad Bangladesh: Coordinated student engagement, event promotion, and technology awareness activities
- Organizing Committee Member — AUST CSE Carnival 5.0, Annual Picnic, CSE Cricket Tournament, and CSE Cultural Fest: Managed logistics, coordination, and team execution for large-scale events

Achievements

2026 **SQA Hackathon Champion, TECH X** — Identified 20+ defects in a banking application within 3 hours through structured exploratory and functional testing

2019 **BCSIR National Science Fest Runner-up** — Developed a low-cost prosthetic hand using embedded system principles

2016 **BCSIR National Science Fest Champion** — Built an Arduino-based smart security system with real-time monitoring

2022–2025 **AUST CSE Sports Achievements** — AC RED League Football Tournament Champion; Futsal Championship Champion; Football Championship Runner-up; Cricket Tournament Runner-up
