PERSONAL PROFILE

Dealing with practical issues excites and motivates me. Through team collaborations and the organization of competitive events, I have developed my technical talents, communication abilities, and leadership traits, all of which stem from my passion for programming and hardware. The opportunity to join a prestigious organization excites me because it will allow me to put my skills to use, learn new things, and advance in my career. My readiness to have a significant influence in the IT business is a result of my problem-solving skills, resilience, and dedication to excellence.

EDUCATION

Ahsanullah University of Science Technology

Nov 2021 – Dec 2025

B.Sc. in Computer Science and Engineering

Bir Shreshtha Munshi Abdur Rouf Public College

2020

HSC

GPA: 5.0

EXPERIENCE

AI & Hardware Developer, AI ROBOT BONDHU, Intvill Limited .

2016-2019

ICT MINISTRY, BANGLADESH

Bondhu is the first bilingual artificial intelligence robot in Bangladesh.]

SKILLS

- **Programming Language:** Python, C, C++, Java, C#, HTML, CSS.
- **IoT Platforms & Protocols:** Arduino, ESP32, MQTT (basic), HTTP/REST.
- **Embedded & Hardware Skills:** Sensor interfacing, data acquisition, actuator control, hardware debugging.
- **Development Tools:** Git, Docker.
- **IDEs:** Visual Studio, VS Code, Arduino IDE, Android Studio, NetBeans, Google Colab.
- **Framework & Database:** ASP .NET MVC, Android, PHP, MySQL, Firebase.
- **Testing & Validation :** Device testing, sensor data validation, API testing (Postman)
system integration testing, basic fault detection.
- **Soft-Skills:** Leadership, Communication, Team -work, Adaptability.

PERSONAL PROJECTS

Hardware Projects

- [Implementation of Intelligent solar panel system](#) 2024 - 2025
 - A Centralized system for solar power including **protection, cleaning, power sharing, weather monitoring** and other features
 - Used components :** Esp 32, BME 280, BH 1750, Dust sensor, Relay, Jetson nano
MPPT & PWM charger module, Volt & Current sensor etc.
- [The Unified Smart Home Ecosystem](#) 2025
 - Centralized IoT system integrating wellness, security, and energy management with AI-driven monitoring and smart automation.
 - Used components :** ESP32, Raspberry Pi 4, mmWave radar sensor, PIR motion sensor, sound sensor, current sensor etc .
- [Traffic Management System](#) 2024
 - A fog and edge network system for making real time decisions
 - Used components:** Esp32, gyroscope, accelerometer, magnetometer
- **Smart Security System** 2016
 - A IOT project with real time tracking and calling messaging feature
 - Used components:** Arduino Uno, Sonar, Keypads, GSM module, Wi-Fi Module
- **Water tank spill alarm system** 2015
 - An Alarm system to stop water tank spilling
 - Used components:** Arduino, Relay switch.

Software Projects

- LearnLink

[Role: QA Engineer | HTML, JavaScript, CSS, C#, ASP .net MVC] 2024

 - Created and executed **50+ test cases** to validate system features and user interactions.
 - Tested **30+ complete user journeys**, including course enrollment, content access, and account management.
 - Verified **500+ data records** to ensure accuracy of user progress and course information.
 - Identified, reported, and tracked **20+ issues**, working closely with developers to confirm fixes and improve overall quality.
- Personal Dashboard

[Python, Flask, HTML, CSS] 2025

 - A **cloud-deployed personal dashboard web application** to organize and visualize personal data, focusing on a clean and user-friendly interface.
- Local Business Directory

[HTML, CSS, Bootstrap, PHP, MYSQL] 2024

 - A **web-based business directory system** with integrated database support to manage and display local business information efficiently.
- Root

[Java, Android] 2023

 - An **e-commerce app** for Android using **Java** in **Android Studio**.
Focused on creating a smooth, user-friendly experience to make shopping simple and enjoyable.
- Hospital Management System

[Java, MySQL Server] 2023

 - A **hospital management application** to streamline patient records, appointments, and overall hospital operations for efficient management.
- Underground Racing

[C++, iGraphics] 2022

 - A **racing game** focused on fast-paced gameplay and an engaging user experience.

Research Work:

- Design & Implementation of Intelligent Solar Panel System

Abstract published at
IEEE CS BDC Summer Symposium 2025, HSTU.

 - Implementation with system testing, data validation, sensor accuracy verification, automation and monitoring

EXTRACURRICULAR ACTIVITIES

- Organizing Committee Member
- AUST CSE CRICKET TOURNAMENT, SPRING 2024
 - অস্ট সি এস সি চডুইভাতি বসন্ত পর্ব ২০২৪
 - AUST CSE CARNIVAL 5.0, SPRING 2024
 - AUST CSE REVELRY, SPRING 2024
 - THE LAST NOTE, FALL 2024

VOLUNTEER EXPERIENCE

- ICT Olympiad Bangladesh 2022-2023
Campus Ambassador
- সি এস সি অ্যালামনাই বৈশাখী মিলনমেলা
Volunteer 2025

ACHIEVEMENTS

- BCSIR NATIONAL SCIENCE FEST 2016

Project showcase: Smart Security System

Champion
- BCSIR NATIONAL SCIENCE FEST 2019

Project Showcase: Affordable Prosthetic Hand for Physically disabled People

Runner-Up
- ROBOMANIA 1.0 2024

Bot Fight

Runner-up
- CEFALO, AUST CSE CARNIVAL 2.0 2023

Soccer-Bot Competition

Runner-up
- AC RED League Football Tournament 2024-2025

Football Tournament

Champion
- AUST CSE FUTSAL CHAMPIONSHIP, Fall'24 2025

Inter Aust CSE Football tournament

Champion
- AUST CSE FOOTBALL CHAMPIONSHIP, FALL 24 2025

Inter Aust CSE Football tournament

Runner-up
- AUST CSE Cricket Tournament, SPRING 24 2024

Inter Aust CSE Cricket tournament

Runner-up
- Naimal Memorial Cricket Tournament, Fall 22 2023

Inter Aust CSE Cricket tournament

Runner-up
